Hi I’m Cameron, and I am here to give you a few tips on picking classes so that you will be ready when registration opens.

There are a lot of resources available on the “Registration Resources” page (Step 3) of the ERA website. Use these resources when taking your ERA quiz and when picking your first semester classes. They will help!

The General Education checksheet shows the entire General Education program. If you haven’t chosen a major, you should focus your schedule on your General Education requirements.

The Major and Degree Programs of Study link takes you to a website that contains all of the programs of study for all of Appalachian’s majors and degree programs. You can search for your major or degree program by college or department.

The First Year Course Guides suggest General Education themes appropriate for your major and identify any specific math or science requirements you may need.

Some majors and degree programs require specific math or science courses. In order to determine the appropriate math course for you, consult the Math Guide. The Math Guide will help you decide which math you should take based on your Math Placement Test scores. Remember: check your major or degree program of study to know which math is required for you.

If you are bringing in any college credit, make sure you check your Transfer Course Evaluation on Appalnet. There’s a link to appalnet on the “Registration Resources” page. From there, look under ‘Student Records’ in the ‘Self Service’ tab to find your transfer coursework evaluation. Be sure to check off any transfer, AP or IB credit that you bring with you to Appalachian on your checksheets and program of study.

The rest of the ERA course will provide you with more detailed information about each of the steps involved in registering for classes. It’s best to work through the pages step-by-step. Good luck!
